

**The New York, New Haven & Hartford R. R. Co.  
Central New England Railway Co.**

---

# **Engine Assignment**

**Showing Assignment of Engines to Divisions and  
Service and Instructions with Reference  
to Records and Handling**

---

**CORRECTED TO JANUARY 1, 1924**

---

**FOR THE INFORMATION OF ALL CONCERNED**

---

**J. A. Droege**  
General Superintendent  
New York Division

**W. H. Foster**  
General Superintendent  
Lines West and C. N. E. Ry.

**R. D. Fitzmaurice**  
General Superintendent  
Lines East

**L. N. Reed**  
Mech. Manager

**J. O. Halliday,**  
Supt. of Transportation

*L. O.*

---

## **RESPONSIBILITY FOR ENGINES**

Each engine subject to service will be assigned to a DIVISION and a home terminal the officers of which will be responsible for its Inspection, Maintenance and Use, except:

- (A) When taken by the Mechanical Department with the approval of the Mechanical Manager for repairs heavier than Light and Running; being designated M. D.
- (B) When awaiting service; being designated W. S.

## **TRANSFER ORDERS**

The Superintendent of Transportation will issue the instructions ordering transfers (except for a relief trip), or authorizing changes in assignment, and will be furnished a report, Form 4086, showing fulfillment of each order.

## **RECORD OR DISPOSITION OF ENGINES**

The office of Superintendent of Transportation will keep records as follows:

- (1) Assignment of engines to Divisions.
- (2) Assignment to joint service between Divisions.
- (3) Awaiting service (W. S.).
- (4) Accepted by Mechanical Department (M. D.).
- (5) Disposition when reported out of shops.
- (6) Daily record of all engines, both Train and Division assignment.

All requests for additional power, transfer of power, or any other changes in the disposition of engines, shall be made on the office of Superintendent of Transportation, and requests made on Form 4086.

## **SELECTION OF ENGINES FOR SERVICE**

Assignment of engines to runs on Divisions will be made by the Superintendent; and for joint service on more than one Division, by

the several Superintendents, with the approval of the General Superintendents, covering their portion of the power for such joint service.

The assignment of all engines, both Divisional and Inter-Divisional, will be subject to the review of the Superintendent of Transportation, who will bring to the attention of the General Superintendent assignments to which exception may be taken.

The handling of all engines, in matters relating to mechanical requirements, are subject to the instructions of the Mechanical Manager.

Officers of each Division will handle their power on the basis: First, assigning to regular runs and engine crews when practicable; Second, of operating a limited pool whenever the same engines can be handled by the same group of enginemen, and can be placed under the charge of a certain engine terminal; Third, of making specified terminals responsible for the inspection and maintenance of engines assigned to their charge; Fourth, of taking necessary steps to protect inspection and maintenance of engines that may be used in extra service or in a general pool; and Fifth, of providing proper inspection and maintenance of engines of other Divisions running into terminals belonging to their Division.

In assigning engines to runs, the power best adapted to meet the more important requirements will be used in such preference.

The smaller engines, not too large for the requirements, will be assigned to light runs.

Of the power remaining, that which is the heavier and best adapted will be placed where it can operate to the better advantage. Smaller engines of this medium class which are not required, and those which are too small for any use will be placed W. S., and generally will be white leaded.

Engines when reported out of shops will be assigned by the Mechanical Manager and the Superintendent of Transportation according to mechanical requirements and transportation needs at the time. Preference will be given to grouping engines of a

class; to returning an engine to a run for an engine crew that has made a good record with the engine before shopping; and subject to grouping to the division from which shopped.

Small engines not required for immediate service to be reported promptly to Superintendent of Transportation for disposition elsewhere if they can be used to advantage, otherwise engines will be either placed in white lead or upon the "Awaiting Service" list.

## ENGINES OFF THEIR ASSIGNED TERRITORY

When engines for emergency or other reasons are sent off their assigned territory, the Superintendent of Transportation will arrange for their return to their proper assignment.

When heavy movement of passenger, express or freight business calls for movement of engines beyond their home assignment, the Superintendent of Transportation will arrange for prompt return of such engines to their home divisions.

## DIVISION TEN-DAY ENGINE STATEMENT

Each engine assigned to a Division will be reported on the Ten-Day Engine Statement of the Division to which assigned and will be credited on the statement with the total mileage made during such assignment.

Each Division Ten-Day Engine Statement will include all engines whose assignments were changed from or to that Division during the period, and will give (1) Date of transfer, (2) Number of days the Division Assignment, and (3) Notation to show transfers to from M. D., W. S., or other Division.

The Superintendent of Transportation will furnish the Car Accountant at the close of each ten-day period a statement for each Division, showing the record and assignment of each engine at the date, and will report all changes made in assignment during the period. The Car Accountant will add the mileage, and will make notation of detention of engines by Master Mechanics for light running repairs. Days detention to be obtained by dividing total hours of each period of detention by 24 and counting whole

only. The total days engine was held out of service subtracted from total days on statement will give total days engine was available for service.

Each Division Ten-Day Engine Statement will show on bottom of last sheet for each Division a summary as follows:

- (A) Total engine miles (Passenger, Freight, Switch and Work, with Grand Total).
- (B) Total assigned engine days.
- (C) Average miles per day per assigned engine.
- (D) Total engine days available for service.
- (E) Average miles per day per engine available for service.
- (F) Ratio total serviceable engine days to total assigned engine days.

All days during which an engine is assigned to a Division, including time undergoing light and running repairs, will be counted in computing the "average miles per day per assigned engine."

### **ENGINES UNASSIGNED TO DIVISION SERVICE**

All engines not in service are to appear on the Ten-Day Statement of the Division on which located, or on a statement for each Mechanical Department Shop under a Shop Superintendent, as W. S., or M. D., with such further subheadings or explanations as the Mechanical Manager may deem advisable.
