

FORM SCS-1
(CANCELS FORM T-488)

**New York, New Haven & Hartford
Railroad**

STATION NUMBERS

which must be used in making out
Conductors' Passenger Train Reports
Forms 1591-1595
AND
Conductors' Freight Train Reports
Forms 1582-1585

Effective October 15, 1944

J. L. BARNGROVE, JR.
Superintendent of Car Service

APPROVED:
S. F. MACKAY
General Superintendent
of Transportation

INSTRUCTIONS

The Station Numbers shown in this book must be used to indicate the "Station To" and "Station From" which locomotives and car are moved on the Conductors' Passenger Train Report, Forms 1591-1595, and on the Conductors' Freight Train Report, Forms 1582-1585.

The Station Numbers are listed in three ways, (1) by lines, (2) alphabetic order, and (3) numeric order. For convenience, all interchange points and principal stations have been given two digit numbers. All other stations have been given four digit numbers. Insofar as is possible the station numbers have been arranged in series for the principal routes and in groups by branches so that the geographical location of a particular station may be more readily identified. The numbers assigned do not indicate mileage and should not be used in computing mileage. In addition to showing station numbers and names, the State and the division on which the station is located are shown. The divisions are abbreviated as follows: NH for New Haven, H for Hartford, P for Providence, B for Boston. Stations located on the New York Connecting are indicated by the abbreviation NY Conn.

The Conductors' Passenger and Freight Train Reports are of the utmost importance in operating the Transportation business of the railroad. They are the basic source of information on the movement of locomotives and cars and are used for tracing cars for shipper and consignees, for determining location and disposition of cars, for computing mileage and per diem payments to car owners and for computing the tonnage handled and other vital statistics of the New Haven's operations. Conductors, Yard Clerks, and others preparing these reports, therefore, should take the utmost care to see that locomotive and car movements are reported correctly by use of the station numbers shown herein, and that all other information called for by the instructions carried on the forms is accurately and correctly reported.

J. L. BARNGROVE, JR.
Superintendent of Car Service

APPROVED:
S. F. MACKAY
General Superintendent of Transportation
